

Easy-Clean UniFlex

Sanitary stainless steel - washdown duty motor

Quick disassembly & fast reassembly - tool-less cleaning

Conical shaped hopper

Quick-Release Tri-Clover clamps

Elimination of flat surfaces that can hold product

Control panel - stainless enclosure

No corners - all surfaces are rounded

Easy-Clean UniFlex

Special “tilt” feature that allows conveyor to be dropped to a horizontal position to facilitate easy cleaning and/or enable the unit to be moved to a cleaning location. Includes linear actuator for raising and lowering the upper section of the conveyor.

3" Diameter OD type UHMW casing – stainless steel casing optional

The Easy-Clean UniFlex auger/screw conveyor is a simple, but ruggedly designed conveyor. This versatile piece of equipment is capable of transporting a wide range of free flowing powders, granules, or small pellets safely and reliably. It features rounded corners for ease of cleaning and is totally fabricated from type 304 stainless steel.

Easy-Clean UniFlex conveyors easily integrate with a vast array of upstream and downstream equipment.

The Easy-Clean UniFlex conveyor is comprised of two main sections, a fixed lower portable base frame with 4 swivel casters, and an upper conveyor assembly.

The lower portable frame supports a bearing-shaft pivot system which allows the upper conveyor assembly to be tilted down to a horizontal position. This upper conveyor assembly supports the infeed hopper, casing and drive / discharge assembly.
