TIPTRAK
OVERVIEW

For over 45 years, TipTrak™ Bucket Elevators have defined the frontiers of gentle handling, low maintenance and spillage prevention.

Every TipTrak™ features a patented stainless-steel reinforced rubber chain which, once installed, never requires lubrication or tensioning. The utilization of rubber chain technology also significantly reduces noise.

The continuous interlocking bucket assembly running through the TipTrak™ offers smooth handling and prevents product damage, spillage, spillage-related hazards, clean-up and maintenance.

Three models, choice of carbon or stainless steel construction, and full customizability means that TipTrak™ can be made to perfectly suit each and every unique application and environment.

When it comes to continuous conveying and preventing material degradation, TipTrak™ is a must-have asset for long-term uptime and return on investment.

TIPTRAK OPEN TUBULAR

The Open TipTrak™ offers at-a-glance monitoring, and easy cleaning access with a frame of square steel tubing (stainless or painted carbon steel). Personnel guarding and a multitude of other options allow for full customization of the equipment.

TIPTRAK MONOCOQUE

The Monocoque TipTrak™ features a fully sealed construction and is ready to operate in explosive, hazardous, and contamination-sensitive environments. This fully-customizable model can be gas-purged and subjected to positive or negative pressure.

TIPTRAK PEC

The PEC TipTrak™ is suitable for most applications and is our best-selling model. The enclosed design means that dust is contained and operators are protected. This fully-customizable unit is ready to handle your elevating and conveying challenges.
